

Tamara's Painting Company-Reno, Nevada PDCA Member-Testimonial

We started using Peel Bond and are amazed with its results! One of the applications where we use Peel Bond is with our house repaints. We often repaint homes where the fascia and trim is in very poor condition. Most clients do not want to replace the wood and that's where Peel Bond comes in with its great bonding ability and high build capacity. We apply one or two coats prior to our base and top coats. Our customers are elated with the end results!

Your Latex X-tender is used on all of our interior woodwork. Our customers seem surprised 'how smooth our brush work looks'.

I just know how happy we are with your products. Again, thank you XIM for making us look great.
